Introduction

Thank you for purchasing one of our Sea Eagle EZ Carts! With over 40 years of experience in this business we strive to make our products the best on the market and with loyal Sea Eagle customers such as you we believe we are achieving this goal.

Our EZ Cart is simple to use and quick and easy to assemble.

The 'S' (or small version) is used with our Sea Eagle Kayaks, SE-8, SE-9, PaddleSki, 285FPB & 375FC FoldCat models.

The 'W' (or wide version) can be used with our 124 Super Motormount Boat, 8.10YT Yacht Tender & 440FC FoldCat.

We do not recommend using either model for our heavier boats or with a boat carrying a gas engine up to or over an 8HP.

We do not recommend standing on the EZ Cart nor trying to use it as a trailer with the use of a motor vehicle.

Orders placed directly with SeaEagle.com include a packing list when the items are delivered. For orders placed with dealers or resellers it is advised to contact that dealer or reseller directly if there are any discrepancies with your order. It is important to verify everything is correct and accounted for once you receive your order so that if there is any issue we can resolve it A.S.A.P for your benefit.

Our office hours are from 9-5, Monday-Friday, EST and we can be contacted directly by our toll free number at 1-800-748-8066.

Please note that if you are still within our trial period, putting a permanent marking on your EZ Cart will VOID your 180 day trial period and the product will not be accepted for return. The 180 day trial period does not apply to orders purchased through an authorized dealer or third party as this offer is available exclusively through Sea Eagle.

Parts & Assembly

- EZ Cart Long Bar (EZ Cart W)
- EZ Cart Short Bar (EZ Cart S)
- 2 Wheel Frames
- 2 Wheels
- 1 Hardware Bag (4 washers, 2 lock pins & 2, 67" boat straps)

Begin by taking a washer and sliding it over the pin on the wheel frame.

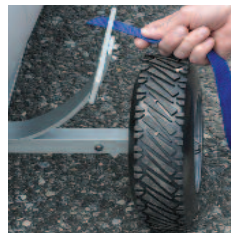

Slide the wheel over the pin and the washer.

Place a washer over the pin and the wheel (so that you have a washer on each side of the wheel) and then take one of the circular lock pins and slide it through the pin on the wheel frame. Repeat these steps for the other wheel & wheel frame.

Take one of the wheel frames and insert into the opening on the EZ Cart bar by pushing in the button on the bar. You can adjust the length of your EZ Cart using the different holes spaced throughout the bar.

Once you have the desired length to match your Sea Eagle Inflatable, you can then place your boat on the EZ Cart and proceed to run the straps through the loops on the wheel frame.

For most boat models you will only need to strap over the top of the boat. The straps make sure that the boat stays in place while you are pulling the boat. For larger models like our FoldCats & SailCat you can strap down each pontoon to the loop on the wheel frame.

You are now ready to use your Sea Eagle EZ Cart!
